1. Introduction

1.1 The Company

Equiti Global Markets Ltd (hereinafter the “Company”) is a Cyprus Investment Firm (hereinafter the “CIF”) authorised and regulated by the Cyprus Securities and Exchange Commission (hereinafter the “CySEC”) under the license number 415/22 and operates under the Markets in Financial Instruments Directive (MIFID II).

The Company is acting as an agent under the straight-through processing (STP) model. As such, once an order is received, the same is automatically and without human involvement transmitted directly to the liquidity provider of the Company for execution. The Company is risk averse and conservative in terms of its overall risk appetite.

The Company operates in European countries, where eligible to do so, and as of 31st of December 2025 had 5 employees all of which are located in Cyprus.

The Company has a stable business model, and this is reflected in;

- A well-balanced capital allocation between the Company’s operations,
- A geographically balanced model.

The Company’s growth strategy focuses on its existing areas of expertise and the quality of its customer base. The Company strives for sustainable profitability consistent with its cost of capital and a balanced business model. To this end, the Company;

- Calibrates its capital ratio to ensure a significant safety margin relative to the minimum regulatory requirements,
- Monitors the stability and diversification of its funding sources,
- Ensures enough resilience in scenarios of liquidity shortages, and
- Tightly controls its foreign-exchange risks.

The Company ensures that compliance rules are rigorously respected, especially in the area of anti-money laundering and terrorism financing. The Company monitors the loyalty of the behavior of its employees to customers and all its stakeholders, as well as the integrity of its investment and financial practices.

The Company’s business effectiveness is based on the guidelines of the risk management policies and procedures put in place. The Board of Directors, Internal Audit, Risk Manager, Compliance and Anti-Money Laundering Officer control and supervise the overall risk system so that all units charged with risk management perform their roles effectively on a continuous basis. The Company is exposed to a variety of risks, particularly credit risk and operational risk. More information can be found in the sections below.

The Company considers its reputation to be an asset of great value that must be protected to ensure

its sustainable development. The prevention and detection of the risk of harm to its reputation are integrated within all the Company’s operating practices. The Company’s reputation is protected by making its employees aware of the values of responsibility, ethical behavior and commitment.

1.2 Company Information

The Company is regulated and licensed by CySEC to operate as a Cyprus Investment Firm, with license number 415/22. The Company obtained the license on the 12th of September 2022. The Company’s details are the following:

Equiti Global Markets Ltd

7	Options, futures, swaps, forwards and any other derivative contracts relating to commodities, that can be physically settled not otherwise mentioned in point 6 above and not being for commercial purposes, which have the characteristics of other derivative financial instruments.
9	Financial contracts for differences.

1.3 Regulatory Framework

The report has been prepared in accordance with the national Law 165(I)/2021 on the prudential supervision of investment firms (hereinafter the “Law”), the amended CRR II and CRD V, the European prudential requirements for Investment Firms Regulation (EU) 2019/2033 (hereinafter the “IFR”) and Investment Firms Directive (EU) 2019/2034 (hereinafter the “IFD”).

In a constantly changing and evolving monitoring and regulatory environment it is of the utmost importance to ensure that risks are monitored on an ongoing basis and in cases of any deficiencies and that such are addressed as soon as possible in order to avoid any negative effects on the operations of the Company during the provision of investment services to its clients.

1.4 Scope of this Report

The scope of this report is to promote market discipline and to improve transparency of market participants.. In accordance with the IFR, the Company is required to disclose information relating to its risk management, capital structure and capital adequacy as well as the most important characteristics of the Company’s corporate governance.

The Audit & Risk Management Committee along with the Risk Manager manages the identification, assessment and mitigation of the risks faced by the Company. The Company’s approach to identification and assessment aims to ensure the management mitigates the impact of those risks.

The report provides qualitative and quantitative disclosures related to credit risk, market risk, operational risk and other significant risks faced by the Company.

The Company introduces the “three Pillar concepts”:

- **Pillar 1** - Minimum Capital Requirements: as per L. 165(I)/2021 on the prudential

supervision of investment firms and the European prudential requirements for Investment Firms; Regulation (EU) 2019/2033 and Directive (EU) 2019/2034.

- **Pillar 2** - Supervisory Review Process: the key principles of supervisory review, transparency and risk management are discussed, with emphasis to be given to the development of an internal capital adequacy assessment process for ensuring compliance with regulatory requirements regarding capital adequacy, and
- **Pillar 3** - Market Discipline: the introduction of disclosure requirements and recommendations enhances comparability through the dissemination of information to the market that enables better assessment of the financial strength of investment firms.

Under Pillar III, the Company is required to publicly disclose information about the capital it holds and each material category of risk it faces, including the strategies and processes it has in place in order to manage and monitor these risks. Disclosures are made regarding the risks referred to under Part 6 of the IFR, and these are required to be published at the same date as they publish their annual financial statements. The aforesaid disclosures aim to strengthen market discipline and encourage transparency. Specifically, public disclosures are required in respect of:

- Risk management objectives and policies as per Article 47 of the IFR
- Internal governance arrangements as per Article 48 of the IFR
- Own funds requirements as per Article 49 and 50 of the IFR
- Remuneration policy and practices as per Article 51 of the IFR
- Investment policy as per Article 52 of the IFR
- Environmental, social and governance risk as per Article 53 of the IFR

The disclosures in this report are verified by the external auditor of Equiti Global Markets Ltd, PricewaterhouseCoopers Ltd. The Company is making the disclosures on a solo basis. The Company endeavor to publish the Pillar III disclosures more frequently if there are significant changes to the business operations or other activities.

Where the Company has considered a disclosure to be immaterial or omitted information by reason of confidentiality or proprietary it has been stated as such within this document then such disclosure or information was not included in this report. Additionally, disclosures and/or information not applicable based on the Company's business and activities has been excluded from this report.

The disclosures are reviewed and approved by the Board of Directors (hereinafter the "Board") before the publication to the Company's [website](#).

2. Governance

The Company is committed to having corporate governance, risk management and a control framework appropriate to the size of its business. To achieve this, a comprehensive risk management framework for the identification, assessment, monitoring and control of risks has been implemented.

2.1 Responsibilities of the Board of Directors

The Company's Board defines, oversees and is accountable for the implementation of the governance arrangements that ensure effective and prudent management of the Company including but not limited to the segregation of duties in the organisation and the prevention of conflicts of interest.

The Board has the overall responsibility for the Company, to approve and oversee the implementation of the Company's strategic objectives, risk mitigation strategy and internal governance. The Board must ensure the integrity of the accounting and financial reporting systems, including but not limited to financial and operational controls and compliance with the Law.

More specifically, when managing and/or assessing risks, the responsibilities of the Board are summarized as follows:

- approves and periodically reviews risk strategy and policies,
- approves the risk appetite annually and monitors the Company's risk profile against this appetite,
- ensures that management takes steps necessary to monitor and control risks,
- ensures that management maintains an appropriate system of internal control and reviews its effectiveness,
- ensures that the Company's overall Credit Risk exposure is maintained at prudent levels and is consistent with the available capital,
- reviews and approves changes/amendments to the risk management framework,
- reviews and approves risk management procedures and controls for new products and activities,
- periodically receives risk reports from the management highlighting key risk areas, controls failures and remedial action steps taken by the Management (at least quarterly),
- ensures that the Management as well as individuals responsible for credit risk management possess the requisite expertise and knowledge to accomplish the risk management function,
- ensures that the Company implements a sound methodology that facilitates the identification, measurement, monitoring and control of risk,
- ensures that detailed policies and procedures for risk exposure creation, management and recovery are in place.

The Risk Manager monitors the Company's risk exposure on a continuous basis, identifying the key risks faced and reports them to the Board, which then determines the Company's risk appetite and ensures that an appropriate amount of capital is maintained.

2.1.1 Board of Directors Declaration

The Board of Directors is ultimately responsible for the risk management framework of the Company. Risk Management framework is the sum of systems, policies, processes and people within the Company that identify, assess, mitigate and monitor all sources of risk that could have a material impact on the Company's operations.

The Board of Directors approves in full the adequacy of Risk Management arrangements of the institution providing assurance that the risk management systems in place are adequate with regards to the institution's profile and strategy.

This declaration has been signed by the Board of Directors on 29.04.2026.

2.2 Responsibilities of the Audit & Risk Management Committee

As part of its risk management responsibilities the Audit & Risk Management Committee, as an additional control advises the Board on the overall strategy and the appetite to all kinds of risks, both current and future, and helps the Board when it verifies that this strategy is implemented and to ensure the efficient monitoring of the risks inherent in the provision of the investment services to clients as well as the risks underlying the operation of the Company in general.

The Audit & Risk Management Committee is responsible for;

- Reviewing the risk control procedures and is consulted about setting overall risk limits,
- Reviewing on a regular basis the strategies, policies, procedures and systems used to detect, manage and monitor the liquidity risk and submitting its conclusions to the Board,
- Reviewing the policies in place and the reports prepared to comply with the regulations on internal control, and
- Reviewing the policy concerning risk management and the monitoring of off-balance sheet commitments, especially considering the memoranda drafted to this.
- Reviewing whether the incentives provided by the compensation policy and practices are compatible with the Company's situation with regard to the risks it is exposed to, its share capital, its liquidity and the probability and timing of expected benefits.

It is noted that the audit and risk management committee is comprised of the Risk Manager, the Internal Auditor, 2 executive directors, 1 independent non-executive director and the compliance officer of the Company.

The Board met Seven (7) times during the year of 2025.

2.3 Responsibilities of the Risk Manager

The positioning of the business in terms of risk/return ratio as well as the Company's risk profile by type of risk are analysed and approved by the Board. The Company's risk appetite strategy is led by the Risk Manager to ensure that all different types of risks assumed by the Company are in

compliance with the applicable regulatory framework and the obligations of the Company under that framework and that all the necessary procedures relating to risk management are in place.

Essential indicators for determining the Risk Appetite and their adaptations are regularly supervised over the year to detect any events that may result in unfavorable developments on the Company's risk profile. Such events may give rise to remedial action, up to the deployment of the recovery plan in the most severe cases.

The Risk Manager is responsible for;

- Governance (decision-making, management and supervisory bodies),
- Ensuring compliance with relevant provisions of the applicable legislation relating to risk management issues,
- Management (identification of risk areas, authorisation and risk-taking processes, risk management policies using limits and guidelines, resource management),
- Examining the capital adequacy and the exposure of the Company,
- Analysing the market and its trends,
- Recommending, providing and supervising guidelines on information systems,
- Supervision (budgetary monitoring, reporting, leading risk indicators, permanent controls and internal audits),
- Examining the financial results of the Company, and
- Drafting reports and making recommendations to the Board at least annually.

2.4 Internal Audit

The Company has implemented and maintains adequate internal audit control mechanisms designed to secure compliance with decisions and procedures at all levels of the Company.

The Internal Audit function shall have the following responsibilities:

- Establish, implement and maintain an audit plan which will aim to examine and evaluate whether the Company's systems, internal control mechanisms and agreements are adequate and effective and comply with the legal framework;
- To issue recommendations based on the result of the audit plan's examinations;
- To verify compliance with any potential recommendations;
- Provide timely, accurate and relevant reporting in relation to internal audit matters to the Board of the Company and the Senior Management of the Company, at least annually. The internal audit report shall be presented to the Board for review and discussion. The minutes of the meeting along with the report shall be submitted to CySEC within twenty days from the date of the meeting.

Furthermore, the Internal Auditor shall have clear access to the Company's personnel and books. Likewise, the Company's employees shall have access to the Internal Auditor for the reporting of any significant deviations from the guidelines provided.

3. Organizational Arrangements

3.1 Directorships held by Members of the Management Body

In 2025, the members of the Management body of the Company, given their industry experience, have been taking seats in other Company boards. In line with this, the following table indicates the number of positions that each member holds:

Name	Position in the CIF	Directorships (Executive)	Directorships (Non-Executive)
Iskandar Akef Najjar	Executive Director	6	0
Husam Al-Kurdi	Executive Director	2	0
Charalampos Argyrou	Executive Director	1	0
Haris Papadopolous	Independent Non-Executive Director	1	1
Loizos Georgiades	Independent Non-Executive Director	0	1

Table 1: Directorships held by Members of the Management Body

3.2 Reporting and Control

In line with the requirements set out in the Cyprus Investment Firms Law and subsequent Directives, the Company has been able to maintain a good information flow to the Management body, as it can be seen below:

Report Area	Report Description	Owner	Recipient	Frequency	Deadline
Annual Anti-Money Laundering Report	To present the work undertaken by the AMLCO during the year.	Anti-Money Laundering Compliance Officer	Senior Management, BoD, CySEC	Annual	30/03/2026

Table 2: Periodic Reporting Summary

4. Risk Appetite

The Company defines Risk Appetite as the level of risk, by type and by business that the Company is prepared to incur given its strategic targets. Risk Appetite is defined using both quantitative and qualitative criteria.

The Risk Appetite Framework considers earnings sensitivities to business cycles and credit, market and operational events. The Risk Appetite is one of the strategic oversight tools available to the Management bodies. It underpins the budgeting process, which is also used to ensure capital adequacy under stressed economic scenarios.

The different type of risks is identified and analysed within the report, along with the risk mitigation applied for each risk.

It is noted that the Company is frequently reviewing its policies, procedures and controls with respect to the applicable legislations and ensure compliance with respect to capital adequacy and market discipline, as per the below legal framework:

- Law 87(I)/2017 regarding the provision of investment services, the exercise of investment activities and the operation of regulated markets (“the Law”).
- Law 165(I)/2021 on the prudential supervision of investment firms (the “Prudential Law”)
- Law 102(I)/2016 on Market Abuse
- Regulation (EU) No 600/2014 of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Regulation (EU) No 648/2012 (“MiFIR”)
- Regulation (EU) 2019/2033 of the European Parliament and of the Council of 27 November 2019 on the prudential requirements of investment firms and amending Regulations (EU) No 1093/2010, (EU) No 575/2013, (EU) No 600/2014 and (EU) No 806/2014 (the “IFR”)
- Directive (EU) 2019/2034 of the European Parliament and of the Council of 27 November 2019 on the prudential supervision of investment firms and amending Directives 2002/87/EC, 2009/65/EC, 2011/61/EU, 2013/36/EU, 2014/59/EU and 2014/65/EU (the “IFD”)
- Regulation (EU) 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse (market abuse regulation) and repealing Directive 2003/6/EC of the European Parliament and of the Council and Commission Directives 2003/124/EC, 2003/125/EC and 2004/72/EC (“MAR”)

5. Internal Capital Adequacy Risk Assessment (ICARA)

The Internal Capital Adequacy Risk Assessment (ICARA) falls within the scope of Pillar II and the main objective is to enhance the company’s risk profile, risk management and risk mitigation systems, capital and liquidity. The ICARA is considered an enhancement of the Internal Capital Adequacy Assessment Process (ICAAP) and the Internal Liquidity Adequacy Assessment Process (ILAAP).

The ICARA requires institutions to identify and assess risks not adequately covered in Pillar I, maintain sufficient capital and liquidity to face these risks and apply appropriate risk management techniques to maintain adequate capitalization on an ongoing and forward-looking basis. Additionally, the ICARA is used to promote a dialogue between CySEC and the company, as CySEC assesses the ICARA through the Supervisory Review and Evaluation Process (SREP).

The responsibility of the overall risk management and assessment lies with the Board, while the Risk Manager supervises the implementation of the ICARA and reports directly to the Board the risks identified, how they assessed, how they are monitored, and any issues or shortfalls. These may vary depending on the circumstances and include one or more of the following:

- Review the overall business strategy, risk appetite, capital and liquidity planning;
- Review limits;
- Reduce underlying risk positions through risk mitigation strategies;
- Consider an increase in capital;
- Enhance contingency planning.

Furthermore, the Board reviews and approves the annual report which describes the process created by the Risk Manager and approved by the Audit and Risk Management Committee.

5.1 Stress Tests

Stress testing is a key risk management tool employed by the Risk Manager to rehearse the business response to a range of scenarios, based on variations of market, economic and other operating environment conditions. Stress tests are performed for both internal and regulatory purposes and serve an important role in:

- understanding the Company's risk profile;
- evaluating the Company's capital adequacy and whether the Company can absorb potential losses under the stressed conditions;
- evaluating the Company's strategy whereby the Senior Management takes into consideration the stress test results against the approved business plans in order to determine whether any corrective actions are required;
- the establishment or revision of limits; the stress test results are integral part of the risk management processes for the establishment or revision of limits across products, different market risk variables and portfolios.

Overall, stress testing allows the senior management to determine whether the Company's exposures correspond to its risk appetite. The Company aims to perform financial modelling and stress analysis on a frequent basis, especially when year-end financial results are available or when it revises its business plan.

6. Own Funds and Capital Requirements

The Company’s management must ensure that always holds adequate capital and the Company complies with the capital requirements of the Law. The Company’s own funds must be disclosed as the amount of original own funds with separate disclosures of all positive items (share capital, reserves brought forward, less any proposed dividends, translation differences and audited current period losses, as applicable).

The Company must adhere to minimum capital requirements and proceeds to disclose such information.

As per article 11 of the IFR, the Company shall always maintain, own funds of at least the highest of:

- The **fixed overheads requirement**, which shall amount to at least one quarter of the fixed overheads of the preceding year.
- The **permanent minimum capital requirement**, which is equal to 150,000 EUR.
- The **K-factor requirement**, which shall amount to the sum of:
 - Risk-to-client (“RtC”)
 - Risk-to-market (“RtM”)
 - Risk-to-firm (“RtF”)

6.1 Regulatory Capital

As per Article 9 of the IFR, the Company shall have own funds consisting of the sum of their Common Equity Tier 1 Capital, Additional Tier 1 Capital and Tier 2 Capital, and shall meet all the following conditions, at all times.

$\frac{\text{Common Equity Tier 1 Capital}}{\text{Max (fixed overheads, minimum capital requirement, K-factor)}}$	$\geq 56\%$
$\frac{\text{Common Equity Tier 1 Capital} + \text{Additional Tier 1 Capital}}{\text{Max (fixed overheads, minimum capital requirement, K-factor)}}$	$\geq 75\%$
$\frac{\text{Common Equity Tier 1 Capital} + \text{Additional Tier 1 Capital} + \text{Tier 2 Capital}}{\text{Max (fixed overheads, minimum capital requirement, K-factor)}}$	$\geq 100\%$

The below table illustrates the Company’s own funds, capital requirements and capital adequacy ratio as of 31st December 2025. It is worth mentioning the fixed overhead requirement was greater than the permanent minimum capital requirement and the K-factor requirement. Therefore, the own funds ratio is the total own funds against the total own fund’s requirement amount of the fixed overhead requirement equal to USD 213,772.

The Total Own Funds Ratio of the Company stood at 1,230%, being well above the regulatory requirements of 100%, as of 31st December 2025.

OWN FUNDS REQUIREMENTS	USD Thousands
Eligible Funds	
Common Equity Tier 1 Capital	2,634
Tier 1 Capital	2,634
Total Own Funds	2,634
Own Funds Requirements	
Permanent minimum capital requirement	176
Fixed overhead requirement	214
Total K-Factor Requirement	81
Total Own Funds Requirement	214
CET 1 Ratio	1,230%
Tier 1 Ratio	1,230%
Own Funds Ratio	1,230%

Table 3: Own Funds Requirements and Own Funds Ratio

Capital management is monitored and implemented by the Risk Manager and the Senior Management. As part of managing its capital, the Company ensures that its solvency level is always compatible with the following objectives:

- Maintaining its financial solidity and respecting the Risk Appetite targets,
- Preserving its financial flexibility to finance organic growth,
- Allocating capital among the various business lines according to the Company’s strategic objectives,
- Maintaining the Company’s resilience in the event of stress scenarios, and
- Meeting the expectations of its various stakeholders: supervisors, debt and equity investors, rating agencies, and shareholders.

6.1.1 Composition of regulatory own funds

The below table illustrates the composition of the Company’s own funds, as of 31st December 2025, which is made up primarily of the following:

- Ordinary shares (net of repurchased shares and treasury shares)
- Retained earnings and
- Other reserves.

Ref	Common Equity Tier 1 (CET1) capital: instruments and reserves	USD Amounts in Thousands	Source based on the balance sheet in the audited financial statements

6.2 K-Factor Requirements

As per article 15 of the IFR, the Company’s K-factors requirements are quantitative indicators that reflect the risk that the new prudential regime intends to address. The K-factors aim to capture the risk the investment firm can pose to its clients (‘RtC’), to the market (‘RtM’) and to the investment firm itself (‘RtF’). The K-factor requirement shall amount to the sum of

- Risk-to-client (“RtC”)
- Risk-to-market (“RtM”)
- Risk-to-firm (“RtF”)

In the following table, a granular detail of each K-Factor is presented; the definitions and the applicable coefficient of the respective amounts to calculate the k-factor requirement. It is noted that the calculations of the K-factors are applicable as per Articles 17, 18, 19,20, 22, 23, 26 and 39 of the IFR.

Risk Type	K-Factors	Article	Definitions	Coefficient Applied for	
Risk To Client (RtC)	K-AUM	Art 17 - IFR	Assets under management – under both discretionary portfolio management and non-discretionary advisory arrangements of an ongoing basis.	0.02%	
	K-CMH	Art 18 - IFR	Client money held – captures the risk of potential for harm where an investment firm holds money for its customers taking into account the legal arrangements in relation to asset segregation and irrespective of the national accounting regime applicable to client money. Excludes client money that is deposited on a (custodian) bank account in the name of the client itself, where the investment firm has access to these client funds via a third-party mandate. (on segregated or non-segregated basis)	0.40%	Segregated Accounts
				0.50%	Non-Segregated Accounts

Risk to Market (RtM)	K-ASA	Art 19 - IFR	Assets safeguarded and administered – ensures that investment firms hold capital in proportion to such balances, regardless of whether they are on its own balance sheet or in third-party accounts.	0.04%	
	K-COH	Art 20 - IFR	Client orders handled – captures the potential risk to clients of an investment firm which executes its orders (in the name of the client, not in the name of the investment firm itself).	0.10%	Cash trades
				0.01%	Derivative trades
	K-NPR	Art 22 - IFR	Net position risk – based on the market risk framework (standardised approach, or if applicable, internal models) of the CRR.		
	K-CMG	Art 23 - IFR	Clearing member guarantee – investment firm’s clearing member – where permitted by a Member State competent authority for specific types of investment firms which deals on own account through clearing members, based on the total margins required by an investment firm’s clearing member.		
Risk to Firm (RtF)	K-DTF	Art 33 - IFR	Daily trading flow – based on transactions recorded in the trading book of the investment firm dealing on own account, whether for itself or on behalf of a client, and the transactions that an investment firm enters through the execution of orders on behalf of clients in its own name.	0.10%	Cash trades
				0.01%	Derivative trades
	K-TCD	Art 26 - IFR	Trading counterparty default – investment firm’s exposure to the default of their trading counterparties in accordance with simplified provisions for counterparty credit risk based on the CRR.		
K-CON	Art 39 - IFR	Concentration Risk – in an investment firm’s large exposures to specific counterparties based on the provisions of the CRR that apply to large exposures in the trading book.			

Table 7: K-Factors definitions and coefficient requirements

The Company presents in the below table the amounts of each factor and the K-Factor requirements, as of 31st December 2025.

TOTAL K-FACTOR REQUIREMENT	Factor amount	K-factor requirement
		81.11
RISK to CLIENT		1.55
Assets under management	0	0
Client money held - Segregated	34	0.14
Client money held - Non - segregated	262	1.31
Assets safeguarded and administered	0	0
Client orders handled - Cash trades	0	0
Client orders handled - Derivatives Trades	1,062	0.11
RISK to MARKET		79.55
K-Net positions risk requirement	0	79.55
Clearing margin given	0	0
RISK to FIRM		0
Trading counterparty default	0	0
Daily trading flow - Cash trades	0	0
Daily trading flow - Derivative trades	0	0
K-Concentration risk requirement	0	0

Table 8: Total K-Factors requirements

6.2.1 Risk to Client (RtC) K-Factors

The below table provides details on the K-factors under RtC, which capture client assets under management and ongoing advice (K-AUM), client money held (K-CMH), assets safeguarded and administered (K-ASA), and client orders handled (K-COH), as of 31st of December 2025.

RISK to CLIENT	Factor amount	K-factor requirement
		1.55
K-AUM: Assets under management	0	0
K-CMH: Client money held – Segregated	34.03	0.14
K-CMK: Client money held – Non-segregated	262.29	1.31
K-ASA: Assets safeguarded and administered	0	0
K-COH: Client orders handled – Cash trades	0	0
K-COH: Client orders handled – Derivatives Trades	1061.6	0.11

Table 9: Risk to Client K-Factors requirements

6.2.2 Risk to Market (RtM) K-Factors

The below tables provide further details on the K-factors under RtM, which capture the net position risk (K-NPR) in accordance with the provisions of the CRR or, where permitted by the competent authority for specific types of investment firms which deal on own account through clearing members, based on the total margins required by an investment firm's clearing member (K-CMG), as of 31st of December 2025. It is noted that under the RtM proxy the Company is only exposed to foreign exchange risk under K-NPR, due to on balance sheets exposures in foreign exchange.

RISK to MARKET	Factor amount	K-factor requirement
RISK to MARKET		79.55
K-NPR: K-Net positions risk requirement	0	79.55
K-CMG: Clearing margin given	0	0

Table 10: Risk to Market K-Factors requirements

K-Factor Net position risk (K-NPR)	K - factor requirement
Total standardised approach	79.55
Position risk	0
Equity instruments	0
Debt instruments	0
Of which: securitisations	0
Particular approach for position risk in CIUs	0
Foreign exchange risk	79.55
Commodities risk	0

Table 11: K-Factor Net position risk (K-NPR) requirements

6.2.3 Risk to Firm (RtF) K-Factors

The below table provides further details on the K-factors under RtF capture an investment firm’s exposure to the default of their trading counterparties (K-TCD) in accordance with simplified provisions for counterparty credit risk based on the CRR, concentration risk in an investment firm’s large exposures to specific counterparties based on the provisions of CRR that apply to large exposures in the trading book (K-CON), and operational risks from an investment firm’s daily trading flow (K-DTF), as of 31st of December 2025. It is worth mentioning that the Company is not exposed to any of these risks.

RISK to FIRM	Factor amount	K-factor requirement
		0
K-TCD: Trading counterparty default	0	0
K-DTF: Daily trading flow – Cash trades	0	0
K-DTF: Daily trading flow – Derivative trades	0	0
K-CON: K-Concentration risk requirement	0	0

Table 12: Risk to Firm K-Factors requirements

6.2.3.1 Concentration Risk

In accordance with Art 4 of IFR, concentration risk means the exposures in the trading book of an investment firm to a client or a group of connected clients, the value of which exceeds the limits in Art 37(1).

As per Art 37(1), the limit with regard to concentration risk of an exposure value with regards to an individual client or group of connected clients shall be 25% of the firms own funds, or specific alternative threshold in relation to credit institutions or other investment firms.

Further to this, as per Art 35 of IFR, investment firms shall monitor and control their concentration risk, establishing sound administrative and accounting procedures and robust internal control mechanisms.

It is noted that, while all investment firms should monitor and control their concentration risk, including in respect of their clients, only investment firms which are subject to minimum own funds under the K-factors should report to the competent authorities on their concentration risks.

Further to the above, Art 54 of IFR requires investment firm to report certain “concentration risk” information on a quarterly basis.

Such information is comprised by the level of concentration risk:

- associated with the default of counterparties and with trading book positions, both on an individual counterparty and aggregate basis;
- with respect to the credit institutions, investment firms and other entities where client money is held;

- with respect to the credit institutions, investment firms and other entities where client securities are deposited;
- with respect to the credit institutions where the investment firm's own cash is deposited;
- the level of concentration risk from earnings;
- as described in points (a) to (e) calculated taking into account assets and off-balance-sheet items not recorded in the trading book in addition to exposures arising from trading book positions.

In line to the above, it should be noted that the Company is not subject to K-CON as it is not authorized to offer the investment service of dealing on own account and therefore it does not have a trading book.

That said, the Company is subject to the rest of concentration risk information listed in Art 54 and proceeds with the disclosure of the required information to the CySEC on a quarterly basis.

6.3 Credit Risk

The Company implements and maintains adequate risk management policies and procedures which identify the risks relating to the Company's activities, processes and systems and where appropriate set the level of risk tolerated by the Company. The Company adopts effective arrangements, processes and systems in light of the level of risk tolerance where applicable.

Credit Risk corresponds to the risk of losses arising from the inability of the Company's customers, issuers or other counterparties to meet their financial commitments. The Company's credit risk mainly arises:

- By the Company's deposits in credit and financial institutions, and
- By assets mainly held from debtors or prepayments made.

6.3.1 Credit Risk Mitigation

The Company follows both regulatory and compliance-oriented Credit Risk Mitigation ("CRM") strategies in order to minimize the possibility of occurrence of this risk, such as:

- The Company has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history and monitors on a continuous basis the ageing profile of its receivables.
- Cash balances are held with high credit quality financial institutions and the Company has policies to limit the amount of credit exposure to any financial institution.
- The Company maintains regular credit review of counterparties, identifying the key risks faced and reports them to the Board of Directors, which then determines the firm's risk appetite and ensures that an appropriate amount of capital is maintained, and
- In order to maintain its Credit risk to the minimum, the Company is using EU credit institutions for safekeeping of funds and it frequently monitors their compliance with the EU regulatory framework and diversifies the funds over several credit institutions thus

mitigating the risk exposure efficiently.

- The Company has no significant concentration of Credit Risk.
- Clients cannot commence trading unless funds have been deposited into their account and their deposits have been cleared. Once trading begins, a given margin is tied, or held as collateral, protecting the Company if the position goes against the client. If account equity drops below a certain predefined level, under normal market conditions all client positions are automatically closed, therefore eliminating the risk that clients will lose more money than already deposited in their account.

During the year of 2025, the geographic distribution of the Company's credit risk exposures was concentrated in Europe.

Further to the above, the Company has policies to diversify credit risk and to limit the amount of credit exposure to any counterparty in compliance with the requirements of the Regulation.

6.3.2 *Past due and Impaired Receivables*

Past due receivables arise when the debt has not been made at its due date. A borrower who is past due may be subject to late fees unless the borrower is still within a grace period. Failure to repay the debt on time could have negative implications for the borrower's credit status or cause the loan terms to be permanently adjusted. Impaired receivables arise when the debtor is unable to provide the payment fully, while the past due is when the debtor did not make the payment as of its due date.

6.4 Market Risk

Market risk corresponds to the risk of a loss of value on financial instruments arising from changes in market parameters, the volatility of these parameters and correlations between them. These parameters include but are not limited to exchange rates, interest rates, liquidity risk and the price of securities (equity, bonds), commodities, derivatives and other assets.

6.4.1 *Foreign Exchange Risk*

Foreign Exchange Risk is the financial risk that exists when a financial transaction is denominated in a currency other than the base currency of the company (USD). The foreign exchange risk in the Company is effectively managed by the establishment and control of foreign exchange limits, such as through the establishment of maximum value of exposure to a currency pair as well as through the utilization of sensitivity analysis.

The Company is subject to foreign exchange risk due to on balance sheet exposures to foreign exchange currencies.

6.4.2 Interest Rate Risk

Adverse interest rate movements, both in local and foreign currency, may cause losses to the value of the Company’s assets. The Company’s income and operating cash flows are substantially independent of changes in market interest rates. Furthermore, the Company has no significant interest-bearing assets.

6.4.3 Liquidity Risk

The Company is exposed to Liquidity risk which is the risk that the Company will not be able to meet its financial obligations as they fall due. In periods of abnormal fluctuations in market conditions or financial crisis, liquidity risk can expose the Company to shortfall of access to the capital markets resulting to damages. The Company is protected against liquidity risk as it maintains sufficient liquid assets.

To minimize its exposure to liquidity risk, the Company implements the below Liquidity Risk Mitigation Strategies;

- Regular analysis & reporting to the Board on the Company’s funding needs,
- Monitoring of the Company’s exposures and diversification to avoid rise of concentration risk as per internal policies and procedures, and
- Cash Management.

As per Article 43 of IFR, that the Company should hold an amount of liquid assets equivalent to at least one third of the fixed overhead requirement. The Company has undertaken a specific review of its liquidity risks and ensured it would meet its upcoming obligations. As at 31st of December 2025, the Company held USD 150,150 of liquid assets. More details are presented in the below tables.

Liquidity Requirement	Amount USD Thousands
Liquidity Requirement	84
Client guarantees	0
Total liquid assets	150
Unencumbered short term deposits	0
Total eligible receivables due within 30 days	0
Level 1 assets	150

Table 13: Liquidity requirements

6.5 Operational Risk

Operational risks (including accounting and environmental risks) correspond to the risk of losses arising from inadequacies or failures in internal procedures, systems or staff, or from external events, including low-probability events that entail a high risk of loss. This section describes the monitoring of the Company's operational risk, in addition to providing an analysis of the Company's operational risk profile and regulatory capital requirements.

The Company has developed processes, management tools and a control infrastructure to enhance the Company-wide control and management of the operational risks that are inherent in its various activities. These include, among others, general and specific procedures, permanent supervision, business continuity plans, and functions dedicated to the oversight and management of specific types of operational risks, such as fraud, risks related to external service providers, legal risks, information system security risks and compliance risks.

In order to control the exposure to operational risks, the management has established two key objectives:

- To minimise the impact of losses suffered, both in the normal course of business (small losses) and from extreme events (large losses), and
- To improve the effective management of the Company and strengthen its brand and external reputation.

The Company recognises that the control of operational risk is directly related to effective and efficient management practices and high standards of corporate governance.

To that effect, the management of operational risk is geared towards:

- Maintaining a strong internal control governance framework, and
- Managing operational risk exposures through a consistent set of processes that drive risk identification, assessment, control and monitoring.

The Company implements the below Operational Risk Mitigation Strategies in order to minimize its Operational Risk Exposure;

- The development of operational risk awareness and culture,
- The provision of adequate information to the Company’s management, in all levels, in order to facilitate decision making for risk control activities,
- The implementation of a strong system of internal controls to ensure that operational losses do not cause material damage to the Company and have a minimal impact on profitability and objectives,
- The improvement of productivity, efficiency and cost effectiveness, with an objective to improve customer service and protect shareholder value,
- Established a “four-eye” structure and board oversight. This structure ensures the separation of power regarding vital functions of the Company namely through the existence of a Senior Management. The Board further reviews any decisions made by the Management while monitoring their activities,
- Detection methods are in place in order to detect fraudulent activities, and
- Comprehensive business contingency and disaster recovery plan.

The Risk Manager and the Senior Management employs specialized tools and methodologies to identify, assess, mitigate and monitor operational risk. These specialized tools and methodologies assist operational risk management to address any control gaps. To this effect, the following are implemented;

- Incident collection,
- Key Risk Indicators,
- Business Continuity Management, and
- Training and awareness.

6.5.1 Exposure Analysis

The Company calculate the operational risk using the fixed overhead requirement calculation of the 25% of the preceding year annual fixed overheads. The Company’s overheads requirements as at 31st of December 2025 is USD 213,772 resulting from the annual fixed overheads of USD 855,088.

Fixed Overhead Requirement Calculation	Amount USD Thousands
Fixed Overhead Requirement	213
Annual Fixed Overheads of the previous year after distribution of profits	855
Total expenses of the previous year after distribution of profits	1,052
Of which: Fixed expenses incurred on behalf of the investment firms by third parties	0
(-) Total deductions	0
(-) Staff bonuses and other remuneration	158
(-) Employees', directors' and partners' shares in net profits	39
(-) Other discretionary payments of profits and variable remuneration	0
(-) Shared commission and fees payable	0
(-) Fees, brokerage and other charges paid to CCPs that are charged to customers	0
(-) Fees to tied agents	0
(-) Interest paid to customers on client money where this is at the firm's discretion	0
(-) Non-recurring expenses from non-ordinary activities	0
(-) Expenditures from taxes	0
(-) Losses from trading on own account in financial instruments	0
(-) Contract based profit and loss transfer agreements	0
(-) Expenditure on raw materials	0
(-) Payments into a fund for general banking risk	0
(-) Expenses related to items that have already been deducted from own funds	0
Projected fixed overheads of the current year	0
Variation of fixed overheads (%)	-100.00%

Table 14: Overheads requirements

6.6 Additional and Significant Risks

6.6.1 Marketing and Advertising Risk

The Company does not actively market or advertise its products as its target market mainly focuses on Eligible Counterparties and Professional clients.

6.6.2 Compliance, Reputational and Legal Risks

Compliance risk (including legal and tax risks) corresponds to the risk of legal, administrative or disciplinary sanction, or of material financial losses, arising from failure to comply with the provisions governing the Company's activities.

Compliance means acting in accordance with applicable regulatory rules, as well as professional, ethical and internal principles and standards. Fair treatment of customers, with integrity, contributes decisively to the reputation of the Company. By ensuring that these rules are observed, the Company

works to protect its customers and, in general, all of its counterparties, employees, and the various regulatory authorities to which it reports.

The Compliance Officer is responsible to establish, implement and maintain adequate policies and procedures designed to detect any risk of failure by the Company to comply with its obligations. As part of this the compliance officer identifies the level of compliance risk the Company faces taking into account the investment services, activities and ancillary services provided as well as the types of financial instruments traded and distributed. The compliance officer reports directly to the Board of the Company.

The compliance officer is independent and has the necessary authority, resources, expertise and access to all relevant information.

6.6.3 Money Laundering and Terrorism Financing Risk

Money laundering and terrorist financing risk mainly refers to the risk where the Company may be used as a vehicle to launder money and/or assist/involved in financing terrorism.

The Company has in place and is updating as applicable, certain policies, procedures and controls in order to mitigate the money laundering and terrorist financing risks. Among others, these policies, procedures and controls include the following:

- The adoption of a risk-based approach that involves specific measures and procedures in assessing the most cost effective and appropriate way to identify and manage the Money Laundering and Terrorist Financing risks faced by the Company,
- The adoption of adequate Client due diligence and identification procedures in line with the clients' assessed Money Laundering and Terrorist Financing risk,
- Setting certain minimum standards of quality and extent of the required identification data for each type of client such as documents from independent and reliable sources, third party information,
- Obtaining additional data and information from clients, where this is appropriate and relevant, for the proper and complete understanding of their activities and source of wealth and for the effective management of any increased risk emanating from a particular business relationship or an occasional transaction,
- Monitoring and reviewing the business relationship or an occasional transaction with clients and potential clients of high-risk countries, and
- Ensuring that the Company's personnel receive the appropriate training and assistance.

The Company is frequently reviewing its policies, procedures and controls with respect to money laundering and terrorist financing to ensure compliance with the applicable legislation and incorporated, as applicable, any new information issued/available in this respect.

7. Board of Directors and Senior Management Recruitment

One of the Board's main responsibilities is to identify, evaluate and select candidates for the Board and ensure appropriate succession planning. The Senior Management is assigned the responsibility to review the qualifications of potential director candidates and Head of Departments.

The persons proposed for the appointment should have specialised skills and/or knowledge to enhance the collective knowledge of the Board and must be able to commit the necessary time and effort to fulfil their responsibilities.

Factors considered in the review of potential candidates include:

- Specialised skills and/or knowledge in accounting, finance, banking, law, business administration or related subject,
- Knowledge of and experience with financial institutions (“fit-and-proper”),
- Integrity, honesty, and the ability to generate public confidence,
- Knowledge of financial matters including understanding financial statements and financial ratios,
- Demonstrated sound business judgment, and
- Risk management experience.

7.1 Diversity Policy

As per Article 48 of the IFR, Investment Firms must have in place a policy on diversity about the selection of members of the management body. Diversity is increasingly seen as an asset to organizations and linked to better economic performance. It is an integral part of how the Company does business and imperative to commercial success.

The Company recognizes the value of a diverse and skilled workforce and management body, which includes and makes use of differences in the age, skills, experience, background, race and gender between them. A balance of these differences will be considered when determining the optimum board composition.

The Company is committed to creating and maintaining an inclusive and collaborative workplace culture that will provide sustainability for the organization into the future. This is also documented as best practices in the Corporate Governance Code of many EU countries.

In line with the recent changes in the regulatory reporting framework, the Company has introduced a Board of Directors Suitability & Diversity Policy in 2024.

8. Remuneration

Remuneration refers to payments or compensations received for services or employment. The remuneration system includes the base salary and any bonuses or other economic benefits that an employee or executive receives during employment and shall be appropriate to the Company's size,

internal organization and the nature, the scope and the complexity of its activities to the provisions of the regulatory framework.

During the year of 2025, the Company's remuneration system is concerned with practices of the Company for those categories of staff whose professional activities have a material impact on its risk profile, such as the Senior Management, members of the Board and the Heads of the Departments. The said practices are established to ensure that the rewards for the 'Executive Management' provide the right incentives to achieve its business strategies.

Additionally, the Company takes into account the conduct of business and conflicts of interest risks that may arise. The Company has in place effective conflicts of interest management duties in order to ensure that clients' interests are not impaired by the policy and its practices in the short, medium and long term.

As per Article 51 of the IFR, the Company shall disclose the aggregated quantitative information on remuneration, broken down by senior management and members of staff whose actions have a material impact on the risk profile of the investment firm, indicating the following:

- the amounts of remuneration awarded in the financial year, split into fixed remuneration, including a description of the fixed components, and variable remuneration, and the number of beneficiaries.
- the amounts and forms of awarded variable remuneration, split into cash, shares, share-linked instruments and other types separately for the part paid upfront and for the deferred part.

9. Investment Policy

In accordance with Article 52 of the IFR, IFs should disclose the following information in relation to their investment policy, where value of their on and off-balance sheet assets is on average more than 100 million euro over the four-year period immediately preceding the given financial year:

- a. the proportion of voting rights attached to the shares held directly or indirectly by the investment firm, broken down by Member State and sector;
- b. a complete description of voting behaviour in the general meetings of companies the shares of which are held in accordance with paragraph 2 of Article 52, an explanation of the votes, and the ratio of proposals put forward by the administrative or management body of the company which the investment firm has approved; and
- c. an explanation of the use of proxy advisor firms;
- d. the voting guidelines regarding the companies the shares of which are held in accordance with paragraph 2 of Article 52.

As at 31st of December 2025, the Company does not meet the requirement therefore, no further disclosure is made.

10. Environmental, Social and Governance Risks

Starting from December 26, 2022, investment firms are required to disclose details regarding environmental, social, and governance risks (ESG risks), encompassing both physical risks and transition risks, as defined in the EBA's report referenced in Article 35 of the IFD. This disclosure concerning ESG should occur annually in the first year and every two years thereafter.

However, investment firms meeting the conditions outlined in Paragraph 26(8)(a) of the CySEC Law, with an average total of on-and-off balance sheet assets below €100 million over a four-year period, are exempt from disclosing information pertaining to environmental, social, and governance risks, including physical and transition risks as specified in Article 35 of the IFD.

Given that the company's average total on and off-balance sheet assets for the preceding four-year period are below €100 million, thus meeting the criteria set forth in paragraph 26(8) of the CySEC Law, the company is consequently exempt from the requirement to disclose information regarding ESG.
